- Designed and implemented websites on the WordPress platform.
- Created **JavaScript** scripts for enhanced website functionality.
- Applied the Mobile-First approach.
- Designed website layouts and user interfaces using **Figma**.
- Pixel Perfect Implementation.

PROJECTS

Irregular Verb Learning Platform

Stack: HTML, CSS, JavaScript

Project Goal:

Developed a platform to help users learn and practice irregular English verbs. The core functionality includes a comprehensive list of verbs with integrated audio playback for pronunciation guidance.

[Demo](#)  [GitHub](#) 

Marvel Information Portal

Stack: React

Project Goal:

Develop a web portal using React that presents a collection of Marvel superheroes. Users can load more heroes with a "Show More" button for seamless navigation through the Marvel universe. Selecting a hero opens a panel with detailed information, including a brief description, a list of comic books where they appear, and a direct link to their Marvel Wiki page. The platform uses asynchronous data fetching to ensure smooth and responsive user interaction.

PRRO Configurator

Stack: HTML, CSS, JS, Node.js (Express), MongoDB

Project Goal:

The project aims to simplify the configuration of electronic point-of-sale (POS) cash registers for businesses. It provides a commercial web service allowing users to adjust settings tailored to their needs. Upon entering the store's number, the tool checks for existing configuration files and displays their availability. Through API communication with a server, users receive a list of available license keys. The goal is to enhance operational efficiency for businesses managing their POS systems.
